

# Gene Therapy Drug Safety Assessment

Development of gene therapy drugs is a rapidly growing field, and SNBL has the specialized techniques, equipment, and dedicated resources to provide a range of studies customized to your needs.

Various routes of administration (IV, IT, IVT, etc.) are available to deliver your compound. SNBL offers safety assessment by PCR and anti-AAV antibody assays in animals.

## Experience

## Capabilities

NHP Screening on site Neonatal/Juvenile available
Anti-AAV antibody (AAV2, 5, 9) (AAV8 under validation)
Efficacy
Complement activity
Characteristics (titer)
Gene expression
Virus shedding
Biodistribution (PCR)

### On-Site Resources

Board-Certified Toxicologists  
Board-Certified Pathologists  
Board-Certified Veterinary Ophthalmologist  
Clinical Veterinarians

### Accreditation

GLP-Certified Facility  
AAALAC International

### Supporting Services

Analytical Chemistry  
Biomarkers  
TK/PK  
Clinical Pathology  
Flow Cytometry  
Histology
