

DART Studies

SNBL Japan can draw on extensive scientific expertise and specialized resources to provide a range of GLP-compliant Developmental and Reproductive Toxicology studies customized to you needs.

DART Studies

Fertility Studies
Mice · Rats · NHPs
Embryo-Fetal Development
Mice · Rats · Rabbits · NHPs
Pre- and Post Natal Development
Mice · Rats · NHPs
Juvenile Toxicity
Mice · Rats · Rabbits · NHPs · Dogs

Experience

- 35+ years experience in developmental and reproductive toxicology research
- Hundreds of NHP dams and offspring in past 10 years of background data

Learning and Memory Tests

- We use the Finger Maze test for NHPs
- Can test more animals in a shorter period of time than with the WGTA
- We use the water maze for rodents

Quality of Care and Data

- We offer social housing for DART studies in NHPs
- Industry-leading low fetal loss rate means lower animal numbers, good for 3Rs

Meeting your Timelines

- Our own colony of NHP dams means a quick start to your study

On-Site Resources

Clinical Veterinarians
Board-Certified Pathologists
Board-Certified Veterinary Ophthalmologist
Board-Certified Toxicologists

Accreditation

GLP-Certified Facility
AAALAC International

Supporting Services

Analytical Chemistry
Biomarkers
TK/PK
Clinical Pathology
Flow Cytometry
Histology
